SUMMARY

Frontend Developer with nearly 2 years of experience building responsive and scalable web applications using React.js, TypeScript, and modern frontend technologies. Experienced in developing AI-powered products, implementing complex business workflows, integrating RESTful APIs, and creating reusable UI components. Proficient in React.js, Next.js, and basic Vue.js with a strong focus on maintainable code, and user experience. Adept at collaborating with cross-functional teams in Agile environments to deliver high-quality software solutions.

EDUCATION

2019 – 2025 **Engineering in Information Technology** GPA: 3.44/4.00
Ho Chi Minh City International University (HCMIU)

WORK EXPERIENCE

TEQNOLOGICAL ASIA June 2024 - Present

- Developed and maintained responsive web applications using **React.js** and **TypeScript**.
- Built reusable UI components, implemented business logic, and integrated RESTful APIs.
- Developed enterprise and AI-powered product features, including dashboards, CMS modules, and data management workflows.
- Implemented filtering, searching, sorting, pagination, and state management solutions.
- Collaborated with cross-functional teams to deliver high-quality features.

LONG AN INTERNATIONAL PORT - INTERN August 2023 - October 2023

- Developed mobile application features using **React Native** for internal business operations.
- Built responsive user interfaces for the Documentation System and FAQs module based on an existing web platform.
- Implemented VietQR-compliant QR code generation and rendering functionalities to support payment and information-sharing workflows.
- Collaborated with team members to analyze requirements, develop features, test functionality, and improve the overall user experience.

PROJECTS

Note: Some project names have been partially hidden due to confidentiality and non-disclosure agreement requirements.

F*** Advisory Assist (App)**

- Developed frontend features for an AI-powered meeting assistant platform using **React** and **TypeScript**.
- Built meeting recording and media upload workflows, supporting audio and video files with meeting metadata management.
- Developed meeting management features including meeting lists, meeting sets, advanced filtering, searching, and detailed meeting views.
- Implemented AI-generated meeting content experiences, including transcription, summary, chapter navigation, and chat interactions with meeting data.

- Built audio and video playback interfaces with timeline controls, chapter-based navigation, and media synchronization features.
- Developed **Compliance Assist** interfaces for reviewing compliance analysis results, managing confirmation workflows, viewing risk assessments, and tracking review history.
- Developed **Sales Assistance** dashboards and analytics pages, leveraging **Apache ECharts** to visualize evaluation metrics, category performance, and timeline-based analysis.
- Implemented customer management, prompt management, word replacement settings, sharing functionalities, and tenant-based feature configurations.

Fi***** Advisory Assist (CMS)

- Developed administration tools for managing users, meetings, groups, permissions, feature flags, AI modules, and tenant-specific configurations.
- Built dashboard pages for monitoring AI processing tasks, tracking execution status, identifying failures, and exporting analytical reports.
- Implemented user management features including CRUD operations, bulk actions, CSV import/export, user activation controls, and role management.
- Developed nested group management functionalities with support for hierarchical structures, CSV imports, and dynamic group assignment workflows.
- Built configuration modules for Summary, Compliance, and Sales Assistance templates, including template creation, cloning, testing, activation, and version management.
- Implemented drag-and-drop interfaces for configuring template priorities, compliance standards, confirmation statuses, and inspection result ordering.
- Developed official prompt management, word replacement settings, and feature toggle systems for tenant-level application customization.
- Integrated RESTful APIs and implemented advanced filtering, searching, sorting, pagination, and bulk-action workflows across administrative modules.

Dr***** Project – Car Booking Service Web Application

- Developed a responsive car-booking platform using **React** and **TypeScript**, optimized for mobile-first user experiences.
- Implemented ride-booking workflows, booking management, and booking history functionalities.
- Integrated RESTful APIs for booking operations, user information, and real-time data updates.
- Built reusable UI components and responsive layouts to improve consistency and maintainability across the application.
- Collaborated with cross-functional team members to deliver features, resolve issues, and improve application quality.

SKILLS

Libraries: ReactJS, VueJS

Frameworks: NextJS, NuxtJS

Programming Languages: JavaScript, TypeScript

Web Technologies: HTML5, CSS3, Sass, Tailwind CSS

Development Tools: Git, GitHub, Gitlab, Postman, Figma

Language: English (IELTS Academic 6.5)
